Tamawa collection plays on the beauty of the bakelite beads surface reduced to the pure form of the jewel. Responding to various options, the mini coloured bakelite beads are adjusted on watch, earrings, cufflinks, necklace and rings. On a necklace, those beads are harmoniously following the body movements. There are moving on a stainless steel base resembling to a crescent moon or a 'smiley'. Available in different sizes, the jewel becomes a territory for open and innovative experimentation. Always combined with stainless steel, these accessories sharing their style between fashion and design are available in colours such as red, yellow, blue, orange, violet, rose, black and white. Assembled and married to a seductive palet, Tamawa plays on contrasts, harmonies and the beauty of the ideal object. The incrustrated gemstones or diamonds are enhancing the secret elegance of the five new models of necklaces, an eardrop long or short, a cufflink or a ring with two size and colour beads. Let's be a little while positively exuberant!
